Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to a method of forming a polymer nanocomposite, classified in class 523, subclass 347.
- II. Claims 17-28, drawn to a polymer nanocomposite system, classified in class 524, subclass 445.

The inventions are independent or distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the invention of Group II can be made by mixing the clay and polymer with sufficient shear to exfoliate the clay, rather than using the SCF to exfoliate the clay as required in Group I. Also, the clay of Group II is not necessarily specified as exfoliated, as in Group I, so the clay could be added as nanoclay with no further exfoliating step and still be considered a nanocomposite.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Art Unit: 1714

A telephone call was made to Mr. Jack Friedman on 10/25/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
